PRICE STABILISATION (PRS)

1 INTRODUCTION

1.1 PRS Price Stabilisation Rules

1.1.1 These Rules constitute the prescribed Price Stabilisation requirements for the purposes of Article 48(1) of the Markets Law 2004.

Guidance

1. The Rules in PRS prescribe the circumstances in which Price Stabilisation of an Eligible Security share or Debenture is permitted and the conditions which attach to such conduct.
2. The Rules in PRS are designed to protect market integrity by helping to maintain an orderly market for Eligible Securities shares (thereby avoiding volatility and market disruption) and enhance market confidence.
3. These Rules operate as a defence from the Market Misconduct provision set out in Article 36 of the Markets Law 2004. The Market Misconduct provisions are relevant to any conduct which may affect DIFC markets or users of DIFC markets. *Prima facie*, the stabilisation of a price of a Security Share is market manipulation. However, Article 48(1) provides limited statutory relief for the initial period of trading. This defence is available, in relation to Eligible Securities, to a any Person who can demonstrate that his behaviour is in accordance with these Rules and thereby does not constitute Market Misconduct.

.....

 - (b) ~~in respect of which the total cost of the Shares or Debentures subject to the Offer at the Offer Price is at least \$10,000,000; and~~

Guidance

Pricing limits do not extend to Debentures hence Rules 2.2.1(2) ~~and 2.3.1~~ do not apply with respect to Debentures. Pricing for Debentures is subject instead to the requirement in 2.2.1(1) that the stabilising action is taken to support the Market Price.

- 2.2.2** A Stabilisation Manager and his Stabilisation Agents may, in respect of ~~Shares of a type specified in Rule 1.4.1(2) and where in a position to do so~~ Eligible Securities:

Guidance

- (+) The Stabilisation Manager may also often be the lead manager in respect of the same offer and therefore can over-allot ~~Shares~~ Eligible Securities in the initial allocation and then facilitate the stabilisation by purchasing ~~Shares~~ Eligible Securities during the Stabilisation Window. A Stabilisation Manager and his Stabilisation Agents may also sell short on the market to facilitate stabilisation or in order to close out or liquidate positions established by Price Stabilisation.

2. Rule 5.2.2 also accepts that some participants in the Price Stabilisation may have accrued uneconomic positions during stabilisation and therefore permits a single transaction, probably at the end-of day, to ‘square-off’ the positions between participants. The terms on which these transactions ~~may~~ be carried may often be agreed in the terms of engagement between the Stabilisation Manager and his Stabilisation Agents.
